SUMMARY

Full-Stack Developer with **3+ years** shipping multi-tenant SaaS on Laravel/PHP with modern JavaScript frontends (React, Inertia.js, Vue.js). Founder of **Azz**, a conversion app on the **Salla App Store** running across **1,000+ live merchant stores**, and builder of production platforms in EdTech, healthcare, ERP and document archiving. I design systems that hold up under load: idempotent webhook pipelines, tuned MySQL schemas (**35% faster APIs**, **40% lower query latency**) and payment integrations with MyFatoorah, Tabby and Tamara.

TECHNICAL SKILLS

BACKEND	PHP, Laravel, Livewire, Filament, RESTful API design, event-driven architecture, queues & background jobs, CodeIgniter
FRONTEND	React, Inertia.js, Vue.js, TypeScript, JavaScript (ES6+), Tailwind CSS, GSAP, state management
SALLA, ZID & E-COMMERCE	Salla App Store development, Salla REST APIs, Twilight theme engine, Zid integration, webhook synchronization, script injection, conversion widgets
ARCHITECTURE & DATA	Multi-tenant architecture (single- and multi-database isolation), MySQL optimization, indexing & query tuning, Redis caching, idempotent pipelines
PAYMENTS	MyFatoorah, Tabby, Tamara (split-payment & asynchronous invoicing flows), ZATCA e-invoicing
CLOUD & TOOLING	AWS (EC2, S3), Linux, Docker, Git/GitHub, CI pipelines

PROFESSIONAL EXPERIENCE

Founder & Full-Stack Engineer — Independent SaaS products 03/2026 – Present
Remote · Saudi market

- Own product, backend, frontend and infrastructure for Azz, Ansheta, MediFlow Clinics and Filein: four live SaaS platforms serving merchants, teachers and clinics.
- Launched Azz on the Salla App Store and scaled it to **1,000+ active merchant stores** without degrading storefront performance.

Full-Stack Developer — Al-Mansa Al-Raqmeya for Technical Information 01/2025 – 02/2026
Contract, Remote · Saudi Arabia

- Optimized high-frequency core backend modules, improving API response times by **35%** on enterprise-scale platforms.
- Delivered secure, localized SaaS solutions on customized API layers built for the Saudi commercial market.
- Restructured database indexing across multiple live merchant instances, cutting query execution latency by **40%**.

Full-Stack Developer — Hash Studio Inc. 09/2024 – 01/2026
Full-time, Onsite · Egypt · **Promoted from Backend Development Intern (09/2023 – 01/2024)**

- Owned full-lifecycle delivery of regional commercial SaaS products, from local staging through to production cloud environments.
- Built comprehensive administrative portals with **Filament** and **Livewire**, reducing internal business configuration overhead by **30%**.

Backend Developer — ACWAD 09/2024 – 01/2025
Contract, Remote · Turkey

- Designed low-latency, cross-border REST APIs handling **50,000+** requests per month under strict encryption requirements.
- Coordinated version-control pipelines and distributed builds across agile, cross-functional engineering teams.

Backend Development Intern — Pure Soft 04/2023 – 08/2023
Egypt

- Refactored legacy relational schemas and resolved code-level bottlenecks, building the Laravel foundations the rest of this work is based on.

SELECTED PROJECTS

Azz — Salla App Store · Conversion SaaS

useazz.com · 03/2026 – 04/2026

Laravel · Inertia · React · Salla APIs · AWS S3 · Multi-tenant conversion app for Salla merchants

- Launched a production-grade multi-tenant Salla app that collects voice, photo and video reviews after delivery and turns them into storefront social proof.
- Tuned script injection to serve real-time widgets and live sales notifications across **1,000+ active stores** with no layout shift.
- Built an asynchronous media pipeline on AWS S3 with secured webhooks and strict idempotency rules that eliminate duplicate events.

Ansheta — Interactive classroom activities platform

anshetaapp.com · 2026

Laravel · Inertia · React · Zid · Tailwind CSS · EdTech SaaS, Arabic-first with English

- Built a teacher workspace to design staged activities with questions (manual entry or JSON import), publish them and run team competitions, escape rooms and letter challenges.
- Implemented live game sessions with instant scoring and team leaderboards; students join via link or QR code with no account required.
- Teacher dashboard with content-readiness scoring and analytics over activities, questions, teams and sessions; subscriptions via the Zid store.

MediFlow Clinics — Clinic booking & management system

clinic.namowsecure.com · 2026

Laravel 12 · Inertia · React · MySQL · WhatsApp API · Healthcare, bilingual with dark mode

- Public online booking: patients search doctors by specialty, pick a live slot from a real-time availability engine and get WhatsApp confirmation.
- Clinic back office for patients, appointments, e-prescriptions and invoicing, plus a patient portal with visit history.

Filein — Electronic archiving platform

filein.cloud · 09/2025 – 05/2026

Laravel · AWS S3 · OCR · Multi-tenant · ACL · Document management SaaS for the Saudi market

- Architected a secure, multi-tenant file and document platform with strict access control lists, encrypted storage and a full audit log of every operation.
- Implemented OCR-powered search inside scanned documents, custom folder trees and metadata fields, digital signatures/stamps and per-transaction barcodes.

Gdawel — Cloud ERP & ZATCA e-invoicing

gdawel.app

Laravel · Vue · MySQL · MyFatoorah / Tabby / Tamara

- Multi-tenant ERP with ZATCA-compliant (Phase 1 & 2) e-invoices, full data isolation per business, and MyFatoorah/Tabby/Tamara split-payment flows for accurate invoicing.

Basma — Multi-database HRM system

Enterprise HRM

Laravel · Multi-database tenancy · REST API

- Dedicated database per enterprise account for performance and isolation; REST API layer consumed by the iOS and Android apps.

Nabil.im — personal blog with a custom Filament/Livewire dashboard: draft/publish workflow, media optimization, role-based access, cached server-rendered pages with Open Graph, sitemap and RSS. nabil.im

Parfum — premium perfume e-commerce; single-page checkout with Inertia.js, React and Laravel, embedded Tabby/Tamara split-payment widgets. parfum.sa

2ME Sport — mobile-first sports e-commerce platform on Laravel with a modern JavaScript frontend. 2me.com.eg

EDUCATION & TRAINING

B.Sc. in Computer Science — Menoufia University · 2020 – 2024

Faculty of Computers and Information · Cumulative grade: Very Good

Advanced Web Development Bootcamp (PHP / Laravel) — ITI ·

Completed

Information Technology Institute

LANGUAGES

Arabic — Native · **English** — Professional working proficiency
